

# Work Skills Series Production

## WSSP

### Overview

The Work Skills Series Production assesses basic thinking skills for those working in a manufacturing and production environment.

### Suitable for:

Apprentices, Skilled and Semi-skilled Operators, Production Operatives and Transport Staff.

### Available Platforms

PC, Paper & Pencil

### More information

Please call SHL Direct on 1800 252 733

### VWP1 Understanding Instructions

Measures the ability to follow and apply instructions in practical and work-related situations. The content resembles that typically found in many technical, production or manufacturing environments.

Time: 12 minutes

### NWP2 Working with Numbers

Measures the ability to apply the basic rules of arithmetic to practical and work-related situations. This test is relevant to any job in industry or manufacturing where the appropriate application of basic arithmetic skills is important.

Time: 10 minutes

### CWP3 Visual Checking

Measures the ability to check that one set of indicators corresponds to another set of indicators according to a number of simple rules. This skill is important whenever production of control equipment is being used or set up by semi-skilled operatives.

Time: 7 minutes
